Run UnixWare v.1.0 on 86Box
William 09/02/2022

1. Install 86Box
   https://86box.net/
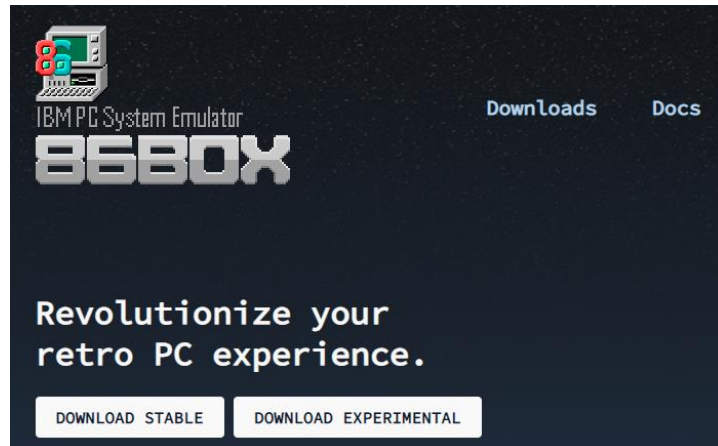

2. Download UnixWare v.1.0 Image File "UnixWare10-86Box.rar"
   http://tenox.pdp-11.ru/os/unixware/1.0/UnixWare10-86Box.rar

3. Copy UnixWare v.1.0 86Box Image File (uxw.hdd) + 86box.cfg File into to 86Box Directory

4. Run 86Box at the first time, it will request to run COMS set up. Just use the default value and set the current date and time.

5. After the item 4, you will see the "Loading UnixWare …" screen.

6. To get the user name and the password, check the README.txt, it shows"
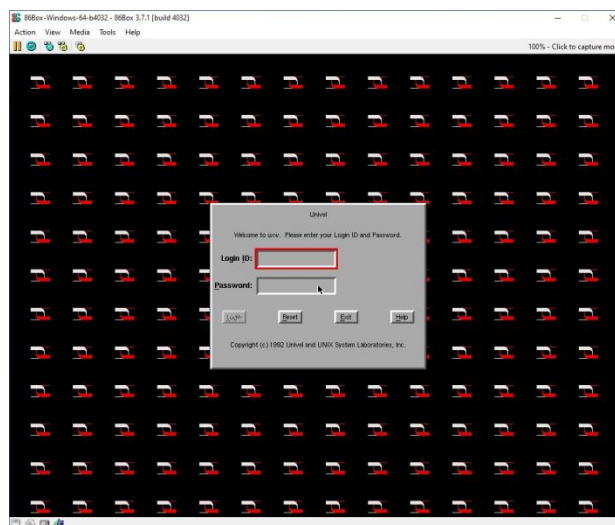

Univel UnixWare 1.0 Personal Edition + TCP/IP
Brought to you by Plamen and Tenox
user/user
root/root

Please note, the root/root is designed for Administrator only, it can't run X widow. Use user/user to run X widow stuff.
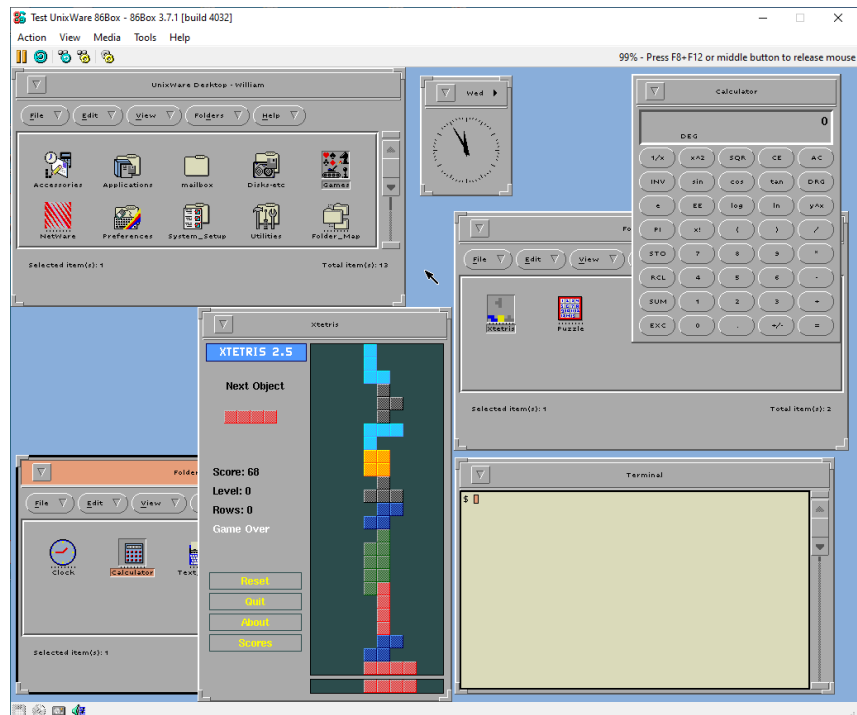

7. The Login Windows:

8. It will say: Your password is expired and request to enter your new password. Login as new password, now we see the UnixWare X window as below. (Login: user/weixu826)

You also can select Open-Look Window Style. To use Open-Look Window, create a new user and set it as an Open-Look Window user. Here is the windows shown by login in William/weixu826

9. How to set new user as an Open-Look window user
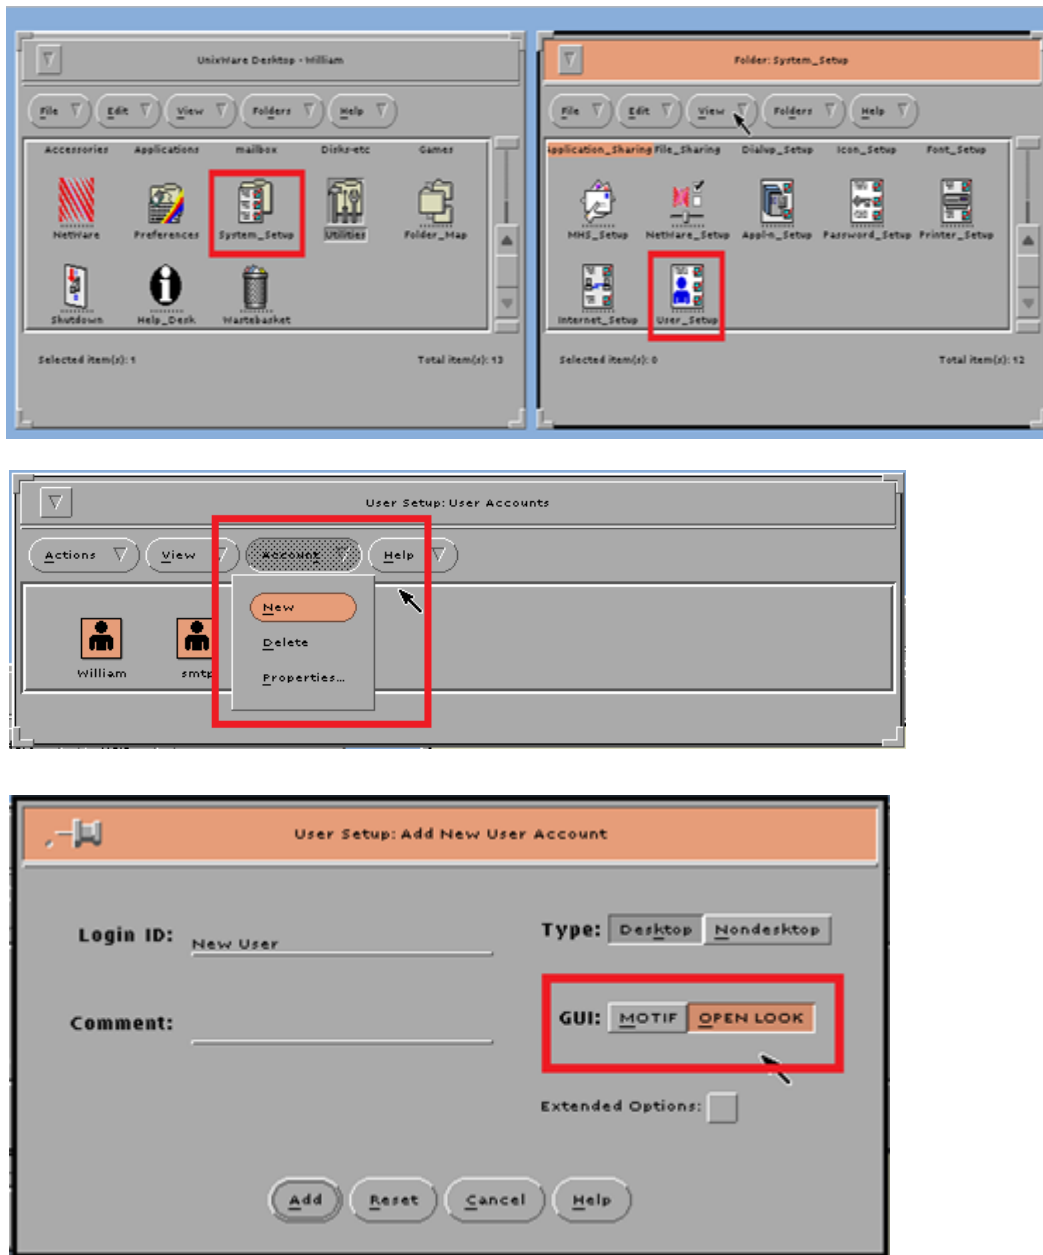

10. To Exit the UnixWare, use **F8 + F12** to release the muse from UnixWare to Window 10.
