

关于 OpenSolaris 以及安装

William Nov. 2022

摘要

OpenSolaris不同于原先的 Solaris OS, 这是基于开放原程序的 Solaris 操作系统。请看下面的英文描述:

OpenSolaris is open-source OS based on Solaris. It was created by Sun Microsystems and **the last stable version (2009.06)** was released in June 2009. **Last preview version (snv_134)** (osol-dev-134-x86.iso) was released in March 2010.

本文描述如何在 VM VirtualBox 7.0 上安装 OpenSolaris 的不同版本:

- A. OpenSolaris 2009.06 - the last stable version;
- B. OpenSolaris (snv_134) - Last preview version.
- C. OpenSolaris Developer Preview 2

1. OpenSolaris 2009.06 -最后稳定版(2009.06)

osol-0906-x86.iso 693MB

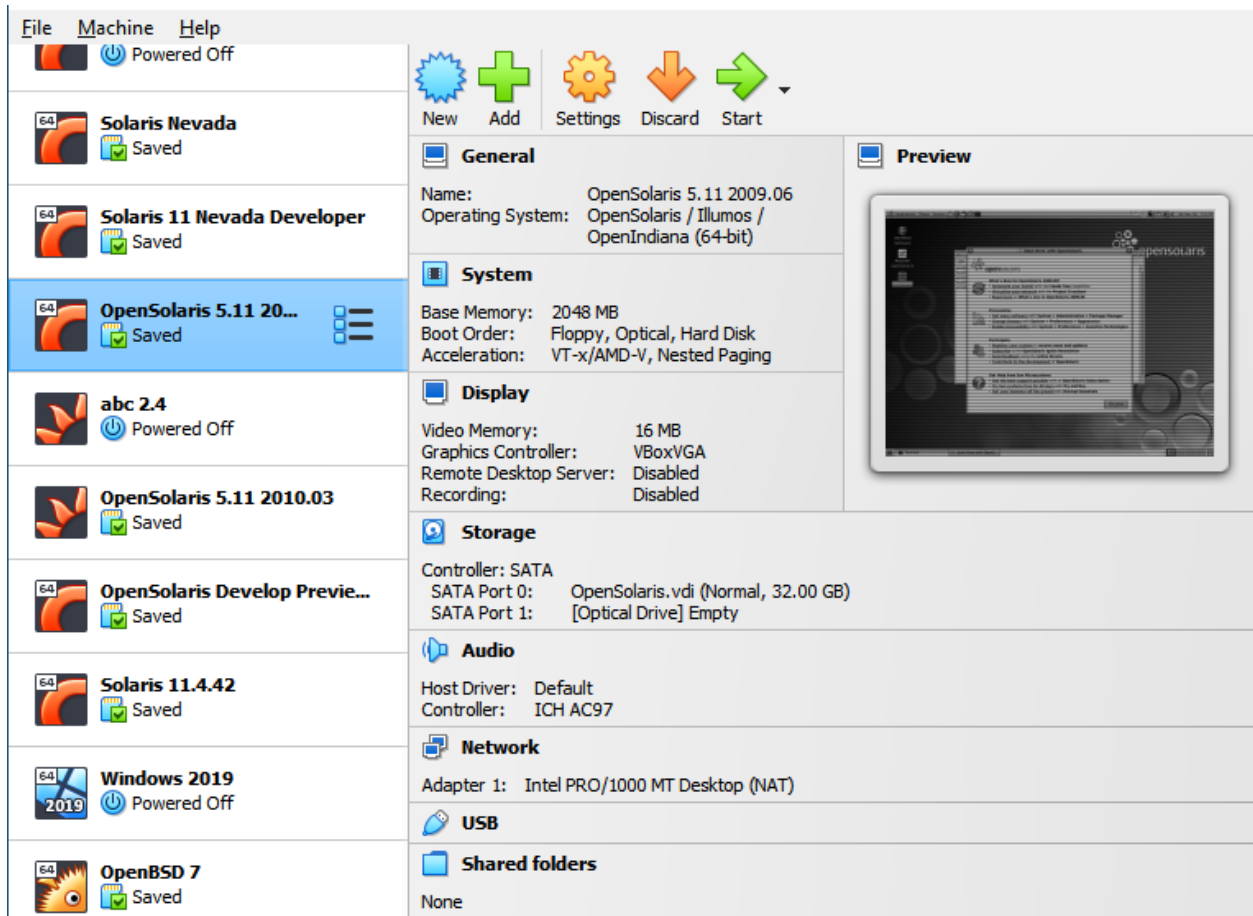

Fig. 2. VM VirtualBox Setup

OS非常容易安装(Oracle VM VirtualBox 7.0). 缺点是ISO文件没有 Develop Kit. 屏幕上面有 Add More Software, 但是在运行添加 gcc时 Download Package出错.

2. OpenSolaris Last Preview Version (snv_134, 2010.03)

Mar, 2010 osol-dev-134-x86.iso 671MB

Download <https://dlc.openindiana.org/isos/archive/opensolaris/>

该系统好处是 Audio Speaker能够接通. 其他几个都不通.
